01 Executive summary

# Returning to the growth path in with/ post-pandemic era

## Stable asset management amid the pandemic (the 13th FP ended September 2021)

- Continued strong performance of KRR's core tenants that deal with daily necessities, even amid the COVID-19 pandemic
- Acquisition of new properties (4 properties for JPY 22.3 billion) through the 5th public offering conducted at the beginning of the 13th FP also contributed to the increase in revenue and profit
- Achieved a record high of JPY 7,328 DPU<sup>(Note 1)</sup>, due to the limited impact of the pandemic on rents as well as gains on sale of properties and cost reduction

## Credit improvement

- Credibility enhanced, mainly due to Kenedix Group affiliated with Sumitomo Mitsui Finance and Leasing Group, diversification driven by AUM growth and stable management amid the pandemic
- Long-term credit rating outlook (JCR) was upgraded to "A+ (Positive)" in January 2021
- Increased the number of lenders from 12 to 18, borrowing from 6 new lenders since the 13th FP
- Borrowing conditions also improved along with the enhanced credibility

## Aim for enhanced stability and sustainable growth in anticipation of post-pandemic era

- Some tenants, mainly service-oriented tenants<sup>(Note 2)</sup>, are taking time to recover their sales amid the pandemic; however, there are signs of recovery following the lifted state of emergency
- Seek to improve the quality and profitability of portfolio by continuous asset and tenant reshuffling, and aim for growth through public offering at appropriate timing
- Set mid-term stabilized DPU and AUM targets at JPY 7,000 and JPY 340 billion, respectively, in response to the recovery of unit price to the pre-COVID level
- Aim to reduce funding costs by diversifying financing methods and lenders, in addition to upgrading to "AA-" credit rating
- Newly set up Sustainability Committee and Sustainability Office to further promote ESG initiatives

Note 1: DPU of the first FP was JPY 7,414, but the asset management period covered 233 days.

Note 2: Refer to tenants not engaged in sale of goods, such as restaurants.

# Stabilized DPU and AUM targets

## Stabilized DPU

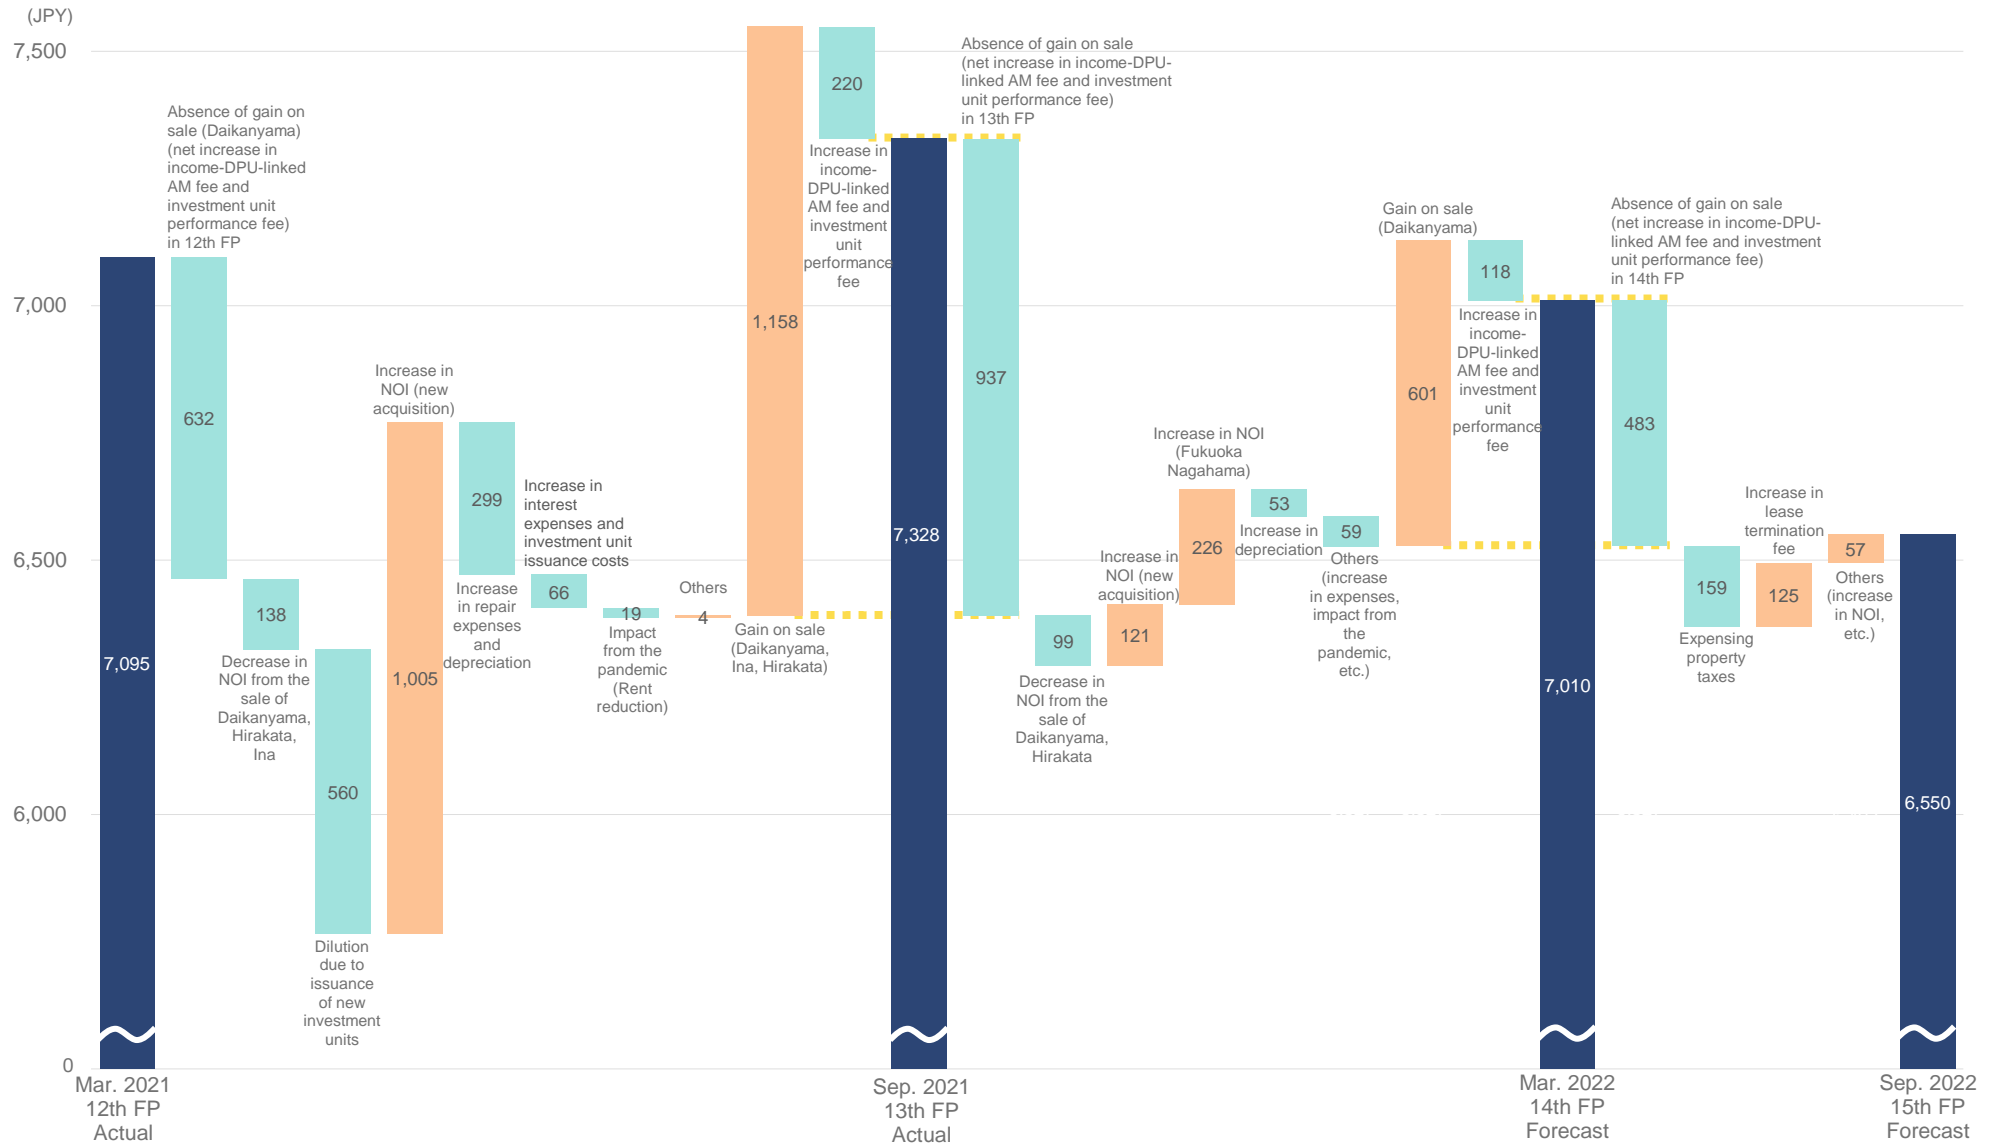

## AUM

Note 1: Stabilized DPU refers to estimated distributions excluding one-time factors, such as profit/loss on sale of property, changes in asset management fee due to such profit/loss, and investment unit performance fee, based on the assumption that property taxes are expensed.  
 Note 2: Capitalized tax effect refers to the case that the property taxes are not expensed in the first year of acquisition for the reason that the property taxes are settled with the previous owner and such amount is capitalized instead of being expensed.  
 Note 3: The substantial asset management period for the 1st FP was 233 days, however, it is adjusted to half year.  
 Note 4: The above targets largely depend on external factors, such as the market environment.

### Investment criteria

Focus on the following four elements in making investment decisions:

<b>Attractiveness</b>	<b>Location</b>
<ul style="list-style-type: none"> <li>Ability to serve particular day-to-day needs of local area customers</li> </ul>	<ul style="list-style-type: none"> <li>Demographic composition, number of households, competing facilities in local retail trade area</li> </ul>
<b>Profitability</b>	<b>Tenant mix</b>
<ul style="list-style-type: none"> <li>Occupancy, leasing status, rent level and lease term</li> </ul>	<ul style="list-style-type: none"> <li>Optimal tenant mix for the property considering tenant credit profiles and retail space usage</li> </ul>

### Primary geographic target areas

- Four major metropolitan areas, which have relatively stable populations
- Selective investments in ordinance-designated cities, core cities and other areas for diversification

### Target portfolio distribution (based on acquisition price)

Distribution centers  
Other retail facilities  
**20% or less**

### Investment in land - Seeking additional growth opportunities

We also seek investment opportunities in the underlying land of retail properties and distribution centers

- Strong demand from retail tenants (the majority of buildings on land-only properties held by J-REITs are retail facilities)
- Maintain maximum value upon termination of lease term, as the land is expected to be returned in its original state
- Investment in lands would be limited to 20% of the portfolio (based on acquisition price) as our general policy

#### Beneficial relationship for both Asset Manager and tenants

##### Advantages to Asset Manager

- Generation of long-term stable rents due to a decrease of vacancy risks because tenants will own buildings pursuant to fixed-term land lease agreements
- Stabilization of rent revenue as tenants will pay maintenance costs related to the buildings on such land
- Improvement of payout ratio as depreciation costs of buildings are borne by tenants
- Limited downside risk related to their asset value caused by external factors, such as fires

##### Advantages to tenants

- Tenants that are both the lessee and property owner bear a smaller financial burden when opening a store
- Increased capital efficiency through treatment of land as off-balance sheet
- Simplified procedures for interior renovation of buildings

Note: Target areas for distribution centers include locations near expressways or major public highways and easy access to a major metropolitan area or an ordinance-designated city and core city.

# Retail property trends and macroeconomic conditions

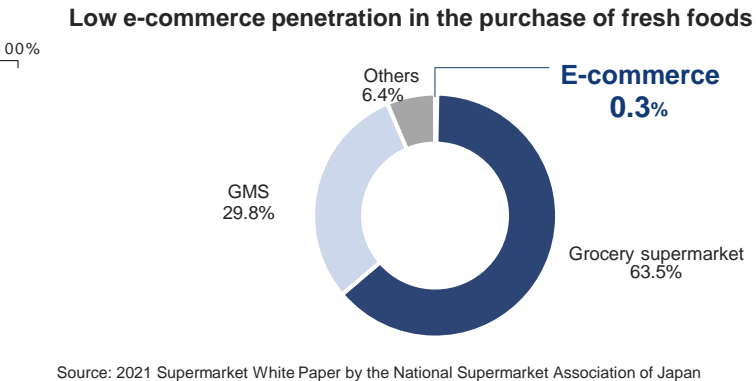

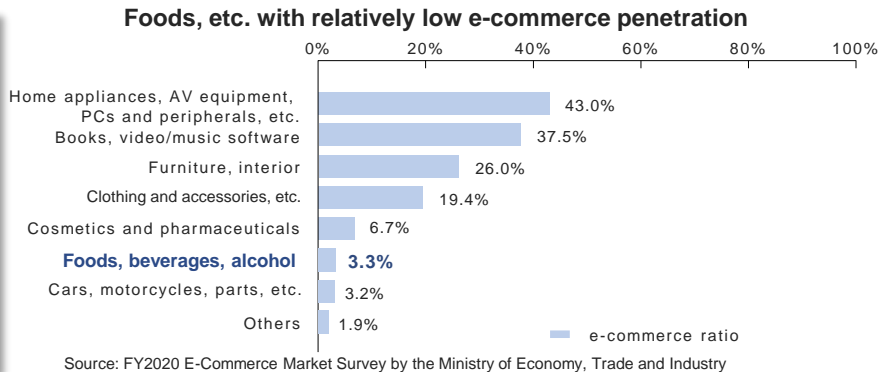

Shrinking retail trade area due to aging and concentrating population in Japan

Changing retail facilities

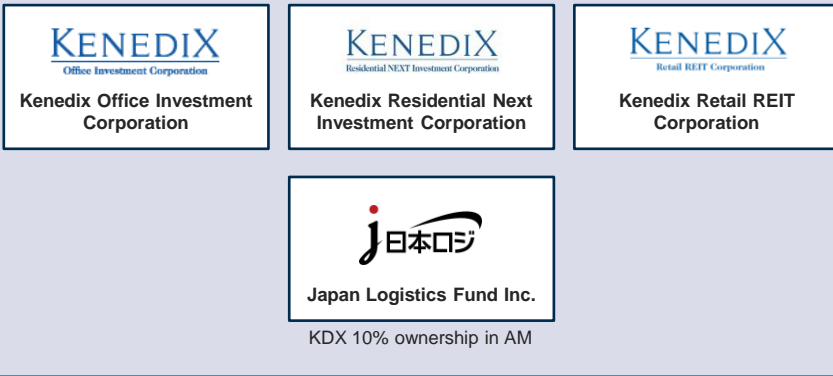

Shopping centers for daily needs are highly resistant to e-commerce
