This is the result of the high standing in which the Investment Corporation, its investment policies, asset quality as well as the personnel and expertise of the Asset Management Company are held among financial institutions. The Investment Corporation also strives to extend average repayment period by placing added emphasis on long-term debt.

Note: Short-term debt is repayable within 1 year. Long-term debt is repayable over terms exceeding 1 year.

### 3. Details of the Changes

The Investment Corporation adheres to a basic policy that adopts a dynamic and flexible investment stance, which accurately reflects its environment and market trends, endeavors to ensure a timely response to each and every opportunity, and strives to develop a diversified investment portfolio with a three-point investment criteria based on property type, area and size. Working from this policy, as of December 11, 2006, the Investment Corporation owned a portfolio of 65 properties with a total acquisition costs of approximately  $\S150$  billion, demonstrating its success in diversifying properties.

The Investment Corporation has previously emphasized investment in mid-sized office buildings located in the Tokyo Metropolitan Area. However, to respond to recent conditions in the office leasing market (increased rent levels, improvement of occupancy ratios, etc.), the Investment Corporation has decided to invest mainly in office buildings and to make no new investment in residential properties for a certain period. The Investment Corporation previously invested in central urban-type retail properties located in highly flourishing districts as an alternative to investment in office buildings.

To make this situation evident, the Investment Corporation has decided to refer to these past investments as "Central Urban-Type Retail Properties," rather than simply as "Retail Properties."
